Customer Reviews

My son loves this book! It is so full of information, it is like three books in one! The pictures are fabulous on every page, and the information is thorough and interesting. We can sit in bed together and look at just one page forever until my son is ready to turn the page. I highly recommend this book for any child who is interested in geology and/or fossils.

I bought this above item for my grandson and had it shipped directly to him.. He liked it. I have not seen it yet.
