# Starfish (Let's-Read-and-Find-Out Science)

## Synopsis

Starfish have arms, but no legs. They have feet, but no toes. Starfish aren't fish, but they are living animals. Kids learn how starfish move, eat, and grow in Edith Hurd's poetic text, illustrated with Robin Brickman's vivid watercolor collages. This is a Stage 1 Let's-Read-and-Find-Out, which means the book explains simple science concepts for preschoolers and kindergarteners.

Let's-Read-And-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series. Supports the Common Core Learning Standards and Next Generation Science Standards

## Book Information

Lexile Measure: 170L (What's this?)

Series: Let's-Read-and-Find-Out Science 1 (Book 1)

Paperback: 40 pages

Publisher: HarperCollins; Revised edition (May 3, 2000)

Language: English

ISBN-10: 0064451984

ISBN-13: 978-0064451987

Product Dimensions: 10 x 8 inches

Shipping Weight: 4.8 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars Â Â See all reviews Â (15 customer reviews)

Best Sellers Rank: #90,253 in Books (See Top 100 in Books) #42 in Â Books > Children's Books > Education & Reference > Science Studies > Nature > Oceans & Seas #50 in Â Books > Children's Books > Education & Reference > Science Studies > Nature > Water #235 in Â Books > Children's Books > Animals > Marine Life

Age Range: 4 - 8 years

Grade Level: Preschool - 3

## Customer Reviews

I found this book very helpful and informative for my kindergarten class. It is both simplistic enough for them to grasp the information and stay "engaged" as well as, complex enough for children to learn several attributes of a starfish...and remember it! There is also a great activity supplied at the end of the book. It's been a winner for me at home and at school. Great for beginners to science.

There is very little actual information in the book. My 4 year old wants to know WHY, HOW, WHEN,

WHERE for everything... this book is very short and has very simple drawings. Did not meet our needs.

Bought this to go with our trip to the Gulf with kindergartener. Although we didn't actually see a starfish we saw crabs and many other critters. She is familiar with starfish so the book was still very engaging and informative. We always like to make our vacations do double duty as fun times to learn. Great book and fun for kids

This is a great book for beginning readers. They learn great things about the ocean. I love it and greatly recommended.

I homeschool my kids and we love all of the Lets read and find out books! We got this one to go with our ocean animals study and it was perfect! We will use more of these books in the future!

My six year old loves this book. If your child likes the ocean, fishes or animals they will love it. Even if they don't its a fun read. Teaches all you need to know about starfishes.

daughter loves this book. she had to do a report in first grade on the starfish and she enjoyed reading this for some "interesting" facts about the star fish. nice pictures.

My second graders loved this book! We live in Florida, but many of the students learned new facts from reading this book.
