Wild Oceans: A Pop-up Book With Revolutionary Technology

Synopsis

Journey into the mysterious world under the sea as 3-D pop-ups swing off the page, bringing to life whales, dolphins, angler fish, and much more! Filled with stunning art and interesting facts about various oceanic zones--such as coral reefs, the frozen sea, the deep sea, and much more--Lucio and Meera Santoro take readers on an interactive and imaginative journey deep beneath the surface of the blue sea!

Customer Reviews

Apparently pop-up books have come a long long way since I was a kid. This book is amazing and basically a work of art. The details of the pop-ups are breathtaking, and the book itself has impressed every person who has seen it. Every page is a new theme: from tides to the dark depths of the ocean. The book is also educational and informative with facts and information on each page. I have apparently entered a new generation of pop-up books. If only I could make every book a pop-up book like this, everything would be so much better.

When I got this pop-up book online along with PREDATORS I thought I would give both books 4 stars but after I looked at both books again recently I will now give them 5!! WILD OCEANS is truly marvelous! Each pop-up scene has special 3D creatures, often suspended above a pop-up

underwater scene and swinging back and forth and bobbing up and down to give the effect of swimming underwater! A crab bobs up and down in an underwater coral scene on the first pages! On THE OPEN SEA pages a Blue whale's tail rises above the waves when you open these pages! And 2 playful dolphins jumped out of the pop-up waves! The next pages titled MONSTERS OF MIDNIGHT is painted in dark colours to represent the deepest depths of the sea and a pop-up Anglerfish with his own fishing lure in front of his mouth swims face first toward the reader! THE CORAL KINGDOM pages has a tropical looking coral scene with a open mouth 3D pop-up shark suspended from the pop-up coral while a smaller green sea turtle appears to swim underneath the coral and when you wiggle the pages both the swimming turtle and the coral fish above him appear to be swimming in the pop-up space!! And finally a pop-up leopard seal appears to escape the jaws of a menacing Orca whale while a bobbing penguin swims toward the reader in the 3D manner of the other suspended creatures in this full colour watercolour detailed book! Lucio and Meera Santoro have managed to come up with their own special style of nature pop-up books with "Revolutionary technology" as they call it! And special pull tabs and corner pop-ups reveal more info and pop-up under sea creatures Highly recommended!

The detail and intricacy of this book not only amazed my grandson, but everyone (including adults) who have looked at it.

This is an excellent and colorful book. Good "engineering" of the "pop-up" aspect....entertaining and giving good information about the Ocean and its inhabitants. Great "cocktail-table" book....

My 4 year old grandson spotted this book in a gift shop and loved it. So, I came home and checked on and got it for him. He has hardly laid it down since. The pop-ups are colorful and so full of action. Beautifully made. A must for any youngster who loves sharks!

I bought this book for my 7 year old niece. She loved it. The illustrations and pop ups were amazing and so sturdy when she pulled the tabs to open them up.

Arrived in great condition. As a lover of popup books I am amazed at the genius of the engineering. It was spectacular and the printing was colorful with vivid colors, surprises and each page was chocked full of items. Great book. My 4 year old grandson was amazed and a little scared at the animals that almost popped out of the book.

Brought as a gift for a bright little boy and he loves it! His parents say it is beautifully done and very educational with wonderful pop ups and interesting information tabs. I would highly recommend based on their very pleased review.
