Fantastic Farm Machines

Synopsis

The day-to-day business of growing and harvesting crops for food is brought to dramatic life in this Nebraska Children's Agriculture Book of the Year as children see farmers and their machinery hard at work. Farmers lifted and hauled, cut and chopped, plowed and planted, waters and mowed by hand or with horses and simple equipment--until the first tractor appeared. Now there are tractors with eight wheels and tires big enough to stand in, skid steers with buckets for lifting, and sprayers that look like huge prehistoric birds, as well as many other modern computerized farming machines. Here's a look at farm machinery in the modern age.

Book Information

Hardcover: 32 pages

Publisher: Boyds Mills Press (February 1, 2006)

Language: English

Customer Reviews

Accurate agriculture books are hard to come by. Chris Peterson uses her own experience on the farm to help convey the message of modern agriculture. The MN Farm Bureau Federation Promotion and Education Committee selected Fantastic Farm Machines as their 2007 Book of the Year.

I purchased this book to use in an activity program for alzheimer's residents. The book is not childish, which is what I wanted and actually very hard to find. The pictures are large and colorful and the wording is easy to read and understand. It is exactly what I was looking for. There are 2

more books in this series and I will definitely be ordering them!

Great book for children! The beautiful photographs show how the machines work, and the text describes their functions well. Everything about this book is well done!

My young boys love farming and everything that goes along with it. This book does an incredible job with the photography to show the readers some of the machines and tractors that are used on farms. Great pictures, great captions. I highly recommend this book.
